

# Asset Management Plans

## ODYSSEUS-IMC PTY LTD

**Pronounced o-dis-e-s**, we are a company dedicated to assisting our clients to improve their asset management capabilities. Our people are leaders in the global market having worked in various countries around the world. We are a specialist unit of consultants that have worked across many industries including but not limited to:

- Water
- Rail
- Power
- Ports
- Local Government

Our Mission is to assist our clients to deliver enhanced services while improving their internal asset management capabilities.

Odysseus-IMC is a client-focussed business dedicated to delivering value added services for a reasonable fee.

Our aim is to develop long term relationships with our clients and support them through the asset management improvement program.

We stand by our clients.

Odysseus-ime has available extensive experience in AM Plan production. We have completed AM plans for the following asset types:

- Roads
- Bridges
- Drainage
- Buildings
- Major facilities
- Aquatic Centres
- Parks and Open Spaces
- Public Artwork
- Water
- Wastewater

AM Plans are tactical plans that articulate the issues to be addressed, management tactics, future financial implications involved in managing the assets long term and the risks involved. In producing the plan recognition needs to be placed on who the audience is and the message to be sent. This will have a significant impact on the detail of the plan's content.

In developing AM Plans we can assist clients by:

- Producing the plans ourselves
- Facilitating the production of the plans
- Assisting our clients to model plan outcomes such as demand, risk and long term financial forecasts
- Providing tools to assist our clients
- Provide specific AM Plan training
- Peer review the plans and their content

The choice is yours. The scope of our work is identified prior to undertaking the project.

Our team has established close working relationships with our clients assisting them to advance their asset management understanding and capabilities.

Call us to discuss your AM Plan requirements and we will provide you with a price that is appropriate to your needs.

Sandy has 30+ years' experience covering a diverse range of infrastructure assets. Sandy was instrumental in the development of asset management processes and methodology now incorporated in the International Infrastructure Management Manual. Sandy has worked with clients to develop client specific models for optimised decision-making, risk management, predictive modelling, budget optimisation and intervention point analysis. He has also been responsible for the delivery of asset management strategies across most industries in Australia and internationally.

Tahlia's strategic approach and problem-solving skills have been used extensively on a variety of projects and has recently taken a primary support role on several leading edge projects. Tahlia has worked closely with our specialists over the past eight years and represents the future of asset management. Tahlia has completed many asset management strategy projects.

Russell is a civil engineer with 40+ years' experience covering auditing, planning, design, construction and operations of infrastructure as well as consulting across industries on asset management issues. His speciality is regulatory support and valuations. Russell has completed numerous asset management strategies over the past 20 years.
