Our combined team brings together expertise in infrastructure management across a diverse range of clients, and includes asset management specialists with extensive hands on experience.

Our core team members are authors of the **International Infrastructure Management Manual** and **Optimised Decision Making Manual**, which are recognised as the benchmark documents for infrastructure management in Australia and overseas.

The choice is yours. The scope of our work is identified prior to undertaking the project.

Our team has established close working relationships with our clients assisting them to advance their asset management understanding and capabilities.

Call us to discuss your asset management needs and we will provide you with a price that is appropriate to your needs.

Sandy has 26 years experience covering a diverse range of infrastructure assets. Sandy was instrumental in the development of asset management processes and methodology now incorporated in the International Infrastructure Management Manual. Sandy has worked with clients to develop client specific models for optimised decision-making, risk management, predictive modelling, budget optimisation and intervention point analysis. He has also been responsible for developing AM strategies for many clients in numerous industries.

Russell is a civil engineer with 34 years experience covering auditing, planning, design, construction and operations of infrastructure as well as consulting to the water sector on asset management issues. His specialty is regulatory support and valuations. He has completed a significant number of valuations for the water, electricity and gas sectors over the past 15 years.

Tahlia's strategic approach and problem-solving skills have been used extensively on a variety of projects and has recently taken a primary support role on several leading edge projects. Tahlia has worked closely with our specialists over the past four years and represents the future of asset management. Tahlia has implemented asset management for numerous clients.

Sarah has ten years experience in the field of asset management in Australia and New Zealand. Sarah has been involved in projects that include asset valuations and reviews, AM plan preparation, AM status reviews and improvement plans in both countries.
