Should your people require long term mentoring then we are there for them. We will assist you to build asset management capacity in your workplace.

Call us to discuss your objectives and we will provide you with a price and training program that is appropriate to your needs.

Sandy has 27 years experience covering a diverse range of infrastructure assets. Sandy was instrumental in the development of asset management processes and methodology now incorporated in the International Infrastructure Management Manual. Sandy has worked with clients to develop client specific models for optimised decision-making, risk management, predictive modelling, budget optimisation and intervention point analysis. He has also been responsible for advancing the functionality of several asset management systems existing in the industry today.

Russell is a civil engineer with 34 years experience covering auditing, planning, design, construction and operations of infrastructure assets as well as consulting to the utility sector on asset management issues. He has completed numerous auditing and asset management commissions focused on improving the management of infrastructure to ensure effective and efficient service delivery.

Tahlia's strategic approach and problem-solving skills have been used extensively on a variety of projects and has recently taken a primary support role on several leading edge projects. Tahlia has worked closely with our specialists over the past four years and represents the future of asset management. Tahlia provides support during the training. She provides assistance to your people and will also provide training to your graduates. In doing so, Tahlia provides a 'young' person's view of asset management.
